**Subject:** FW: CES: Update

Did we get the approval to exceed 2 million? Did you convey our concerns to the PRPs and TCEQ about residential cleanup levels? Will there be an immediate transition into the VCP cleanup or is there a potential for cleanup delays if/when TCEQ takes the lead? If there may be a delay, what are your plans to prevent a delay in cleanup activities? Several more questions that can wait for a briefing in the next week.

**Subject:** CES: Update

Hello All:

Please see the CES Update. We are getting very close to completion except for the waste profile sampling, disposal, and if we do tank hydrocleaning. Therefore, this will likely drag into June. We are working with the TCEQ and EPA RCRA on requirements so we can make calculations on cost and time to do the hydrocleaning.

Thanks
